

Parcel Shipping Capabilities for Oracle Transportation Management

A Seamlessly Integrated Parcel Shipping Solution to Optimize OTM Processes

ShipOTM is a purpose-built parcel shipping solution designed to enhance Oracle Transportation Management (OTM) by enabling faster, smarter, and more efficient shipping operations.

Built to integrate directly with Oracle OTM, ShipOTM empowers businesses with real-time carrier rate shopping, tracking, and freight cost visibility—so you can reduce manual effort and accelerate delivery execution.

Want to know how we helped a customer cut shipment processing time from 10 minutes to 10 seconds?

Deliverables

- Global coverage with 200+ parcel carrier integrations
- Direct integration with Oracle Transportation Management for rating, label printing, execution, and tracking
- Dynamic carrier selection based on routing options within OTM
- Native reporting from OTM datasets
- Automated freight cost calculation
- Integration with Oracle Tracking Events for shipment milestone tracking
- Support for carrier services like Signature Required, COD, POD, and more
- International shipping compliance with electronic commercial invoices for UPS, FedEx, and DHL
- Compatibility with Oracle Cloud, Oracle EBS, and Oracle WMS for unified parcel shipping across your logistics ecosystem

Return on Investment

- Complete control over parcel shipping & visibility into freight spend
- Significantly decrease shipment processing times
- Increase processed shipment volume
- Improve visibility & accuracy of shipment data
- Simplify international shipping processes
- Fast & seamless Oracle Transportation Management integration
- Uninterrupted workflow of shipment processes
- Flexible & configurable for unique business processes
- Quick onboarding with intuitive user interface
