Global Shipment Tracking Data Integration for SAP Business Network for Logistics

Unlock real-time global tracking with ShipERP for SAP – the parcel shipment visibility solution that feeds clean, accurate, and timely transportation data into SAP Global Track & Trace (GTT).

With out-of-the-box support for 250+ global carriers and 3PLs, ShipERP is the data layer that turns your SAP GTT system into a proactive, predictive command center.

Designed for seamless integration with SAP S/4HANA, EWM, TM, and SAP GTT, ShipERP empowers your team to act faster, reduce risk, and improve customer satisfaction.

Why Choose ShipERP

Global Visibility with Integrated Carriers

Access real-time tracking across ShipERP's network of integrated domestic and international carriers.

Real-Time Alerts for Shipment Issues

Stay ahead of delays, missed pickups, and other shipping problems with live milestone tracking.

Data That Drives Action

Only clean, validated tracking events are pushed to SAP BN4L-GTT for reliable analytics.

Quick Deployment, Minimal IT Lift

Prebuilt carrier connectors and streamlined integration mean faster time to value.

Core Features

Global Carrier Integration Hub

Connect to over 250+ carriers with out-of-the-box and configurable connectors.

Real-Time Event Engine

Automatically captures key shipment events (pickup, in-transit, delays, POD) and feeds them into BN4L-GTT.

Analytics-Ready Tracking

Enable stronger predictive analytics and SLA performance with verified data.

SAP-Aligned Architecture

Built to integrate natively with SAP BN4L-GTT, S/4HANA, EWM, and TM.
