

AuditERP – Freight Audit

Companies unnecessarily outsource the freight auditing functionality due to the perceived complexity of the process. With the right auditing tool, the process becomes efficient, accurate and alleviates the complexity. That is where AuditERP can help!

By comparing freight invoicing that is electronically transmitted or manually uploaded to transactional shipping data that is stored in ShipERP, AuditERP provides an integrated process within SAP® for the reviewing and approving transportation invoices.

The solution delivers a toolset to monitor and control transportation costs such as line-haul charges, weight surcharges, oversize surcharges, assessorial charges, fuel surcharges and drayage fees to name a few.

With AuditERP™ as part of your logistics management process you will have the visibility to your logistics costs and the ability to make the best use of the transportation resources. AuditERP is completely compatible with SAP ERP and ShipERP.

DELIVERABLES

- Native SAP integration
- Ability to compare carrier's freight invoice vs estimated freight costs during time of shipment
- Setup Tolerances for Freight Payment Amounts
- Ability to create disputes for late delivery shipments and freight line item costs
- Custom IDOC integration for EDI invoicing
