# CarrierPORTAL

Easy-Access SAP Web Portal For Real-Time Carrier Connection

Deliverables

- Real-time access to carrier performance, delivery statuses, payments, customer signatures, and more
- Digital Signature & Proof of Delivery updates on SAP Delivery
- Dashboard Reporting Standard ShipERP Reporting with easy-to-use interface
- Configurable HTML5 user-friendly interface with easy-to-use mobile integration

SAP-Native Communication Software Facilitating Expedited Multi-Carrier Transactions

When shipping providers are limited by the capabilities of their own integrated technology (or lack thereof), CarrierPORTAL delivers a mobile-friendly solution that bridges the gap between you and those providers. Ideal for companies that manage their own fleets, this portal solution allows shipping carriers, couriers or private fleets to see shipments assigned to them using a web browser or mobile device.

CarrierPORTAL provides visibility to shipments from pickup through delivery, affording the shipper seamless carrier integration and tracking.

Return on Investment

- Eliminate manual processes to maximize shipment processing efficiency
- Save time with expedited invoice generation
- Improve customer service with accurate shipment tracking and estimated delivery times
- Gain stronger visibility for improved risk mitigation and optimized carrier performance
