

## Automate Export Documentation in SAP

### Deliverables

- ACE (formerly AES) compliancy and real-time integration
- Native SAP integration
- Shippers Export Declaration (SED)/Electronic Export Information
- (EEI) filing screen & status reporting process
- Internal Transaction Number (ITN) returned and associated to delivery or shipment

### A Truly Built-In SAP AES Solution

Is your company exporting goods out of the U.S. valued at more than \$2,500? If so, make electronic export documentation processing a breeze when you file with the United States Foreign Trade Regulations.

ShipAES eliminates the need to manually file export information through the Census Bureau's web-based system called ACE AESDirect.

As an SAP-integrated solution, SAP ERP users gain the ability to automate export filing during the shipping process. ShipAES validates at a delivery or shipment level to ensure the export compliance. Upon compliance, the filing is submitted to AESDirect for approval.

### Technical Specifications

- Technology includes web services, HTTP Post, SAP ABAP, SAP BADIs, and SAP RFCs
- SAP Certified ABAP Add-On Shipping Solution
- Resides in its Own SAP Namespace
- Completely configurable - contains its own IMG

### Return on Investment

- Fully integrated submission of EEI
- Documentation creation
- Automatic assignment of ITN to SAP delivery/shipment/freight order document
