# ShipAES

Automate Export Documenation in SAP

A truly Cloud-based AES Solution for SAP

Is your company exporting goods out of the U.S. valued at more than $2,500? If so, make electronic export documentation processing a breeze when you file with the United States Foreign Trade Regulations.

ShipAES eliminates the need to manually file export information through the Census Bureau's web-based system called ACE AESDirect.

As an SAP-integrated solution, SAP ERP users gain the ability to automate export filing during the shipping process. ShipAES validates at the delivery or shipment level to ensure export compliance. Upon compliance, the filing is submitted to AESDirect for approval.

Deliverables

- ACE (formerly AES) compliancy and real-time integration
- Native SAP integration
- Shippers Export Declaration (SED)/Electronic Export Information
- (EEI) filing screen & status reporting process
- Internal Transaction Number (ITN) returned and associated to delivery or shipment

Return on Investment

- Fully integrated submission of EEI
- Documentation creation
- Automatic assignment of ITN to SAP
- Automatic assignment of ITN to SAP delivery/shipment/freight order document
