

## Denied Party Screening Module for Guaranteed Compliance in SAP

### Deliverables

- Real-time denied party list screening
- Robust reporting for shipments and workflow processes
- False match recognition
- Government-certified denied party lists
- Automatic blocks for orders with sanctioned parties
- Shipping prevention based on screening checks
- Detailed list of reasons for shipment denial

### Enhanced Legal Compliancy at the Sales Order Level to Prevent Waste Process, Labor, and Time

Through a partnership with Descartes, ShipERP provides a cost-efficient and cost-effective denied/restricted party screening solution. Because this unique interface provides the capability to determine a denied party at Sales Order creation directly in SAP (with secondary screenings possible at Delivery Order creation) you can prevent wasted process, labor, and time further down your logistics flow. With government certified denied party listings that are constantly reviewed and uploaded by Descartes, your enterprise can legally remain compliant without the hassle or sticker shock.

### Return on Investment

- Prevent wasted process, labor, and time
- Mitigate risk and avoid excess cancellation costs with shipping prevention
- Guarantee compliancy and avoid penalties with government certified denied party lists from Descartes
- Identify issues sooner and facilitate resolutions faster with false match recognition
- Ensure the safety of your enterprise when you securely identify parties involved in your transactions
