ShipERP Spotlight

for Advanced Parcel Contract & Spend Optimization

Deliverables

- Analyze your logistics and 160 million lines of shipping data in the Business Intelligence Shipping Dashboard
- Monitor & manage your parcel shipping and carrier contracts to receive real-time alerts when terms or rates change
- Audit your parcel invoices & recover unclaimed parcel audit credits from carriers
- Compare your shipping health score with your competitors' performance with the Reveel Peer Index
- Receive actionable insights based on six VitalFactors, like surcharge spend and average cost per shipment
- Intuitive, user-friendly interface

Ship Smarter with a Logistics Management Platform That Simplifies & Analyzes Complex Shipping Data

In the world of e-commerce and global trade, efficient shipping and logistics management are critical for success. ShipERP Spotlight is a professional logistics and shipping management platform that leverages machine learning to transform complex shipping data into actionable insights.

Through the power of AI and machine learning algorithms, ShipERP Spotlight identifies areas of improvement to enhance shipping optimization based on your shipping data. The tailored recommendations help achieve time and cost savings immediately, as well as provide full pricing transparency for carrier contract negotiations.

Book a demo to see how you can improve your bottom line.

Return on Investment

- Improve data-driven decision making for more cost-effective strategies
- Prevent overpaying for parcel shipments
- Easily identify opportunities for cost optimization and better carrier contract negotiations
- Potential cost recovery and savings from billing errors and overcharges
- Enable performance benchmarking against peers to stay competitive in the market
- Reduce the learning curve and increase productivity with an easy-to-use interface
