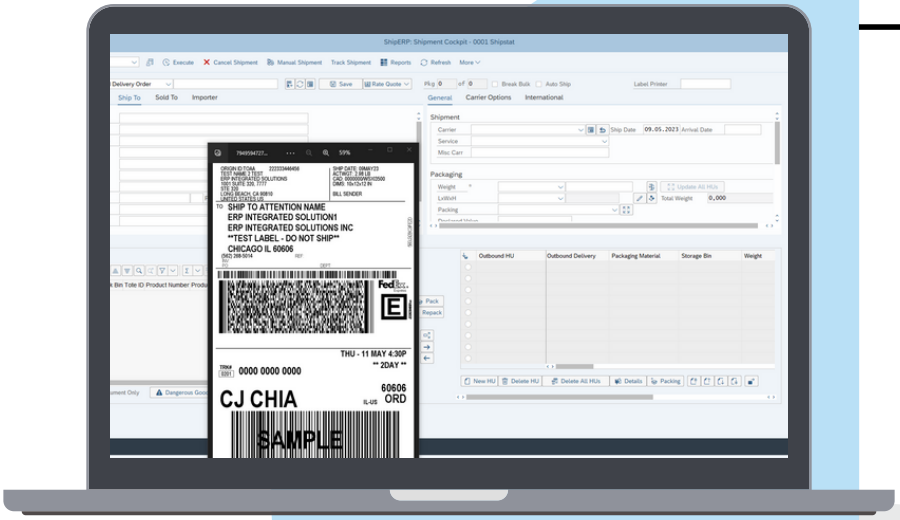
ShipEWM

Parcel Shipping Capabilities in SAP Extended Warehouse Management



Intuitive Parcel Shipment Processing in SAP EWM

Gone are the days of maintaining several parcel carrier shipping systems and internal interfaces. With ShipEWM, you gain the ability to control Carrier & Service Information, Billing option, 3rd Party Account Information, Carrier Tracking Number, Track & Trace Events within EWM.

ShipEWM performs real-time carrier: rate quoting, parcel shipment creation, shipment tracking, proof of delivery and label/documentation printing. Need something that works with your business's unique processes? ShipEWM adapts to that with its completely configurable business rules. It also provides you with the ability to rapidly pack and ship parcels directly out of SAP EWM (native integration).

Since the design of ShipEWM on SAP's Enterprise Service Oriented Architecture (SOA) enables security, flexibility, and business efficiency during the warehouse management shipping process, there's no need for any middleware.

Deliverables

- Architectural design allows for ease of integration - Mobile RF Integration
- Certified for integration with SAP NetWeaver and SAP HANA
- Real-time connection to carriers and real-time updates to SAP
- Rate shopping across multiple carriers within SAP
- Documentation compliancy , including commercial Invoice, Certificate of Origin, etc.
- Domestic/international parcel shipments
- Integration into Outbound Delivery Order in EWM
- Real-time tracking, automated label creation, instant proof of delivery, etc.
- Single-platform parcel shipment processing (no middleware)
- Completely configurable with its own IMG

Return on Investment

- Decrease shipment processing time
- Seamless process with native SAP EWM system integration
- Increase your number of processed shipments per day
- Boost warehouse visibility with cross-functional features on a single platform to get real-time carrier and tracking information
- Minimize time spent onboarding with a seamless interface written in SAP's native ABAP language
- Maximize efficiency and cost savings with optimized warehouse processes (like pack, pick, and ship) through outbound management integration
