

## Parcel Shipping Capabilities for SAP Transportation Management

### Deliverables

- Global coverage with 200+ carrier integrations
- Direct API integration with SAP TM for carrier rate quoting, label generation, execution and tracking
- Carrier Determination at Direct Shipment Options (DSO) level
- Native reporting from standard SAP TM fields
- Freight settlement with freight cost determination
- Standard TM event management integration
- Integrated carrier options (Signature Required, COD, POD, etc.)
- International shipping compliancy, supporting electronic commercial invoices for DHL, UPS, and FedEx
- Freight order processing directly in EWM (with ShipEWM)

### A Natively-Integrated Parcel Shipping Solution for More Efficient Transportation Processes on SAP TM

ShipTM is a natively-integrated transportation solution designed to streamline your parcel shipping operations. The solution is written in the same Advanced Business Application Programming (ABAP) language as SAP Transportation Management (TM), supporting seamless integration and a wide variety of powerful cost-saving functionality.

With this direct API integration, your business can easily handle carrier rate quoting, tracking, and freight cost determination, affording you maximum transparency into your shipping spend.

Reach out to ShipERP today to see how we help companies reduce order processing from 10 minutes to 10 seconds!

### Return on Investment

- Complete control over parcel shipping and visibility into freight spend
- Significantly decrease shipment processing times
- Increase processed shipment volume
- Improve visibility and accuracy of shipment data
- Simplify international shipping processes
- Fast and seamless SAP TM integration
- Uninterrupted workflow of shipment processes
- Flexible and configurable for unique business processes
- Quick onboarding with an intuitive user interface
