

# SupplierPORTAL

Easy-Access SAP Web Portal For Real-Time Supplier Connection

## Deliverables

- Portal access using desktop or mobile web browser
- Real-time access to supplier-generated shipment details
- Numerous inbound shipping functionalities, including:
  - Order acknowledgement
  - Shipment notification
  - Supplier shipment creation
  - Tracking & proof of delivery
- Dashboard Reporting Standard ShipERP Reporting with easy-to-use interface

## Collaboration Software for Greater Visibility and Cost-Savings when Transacting with Suppliers

SupplierPORTAL is a web portal solution that allows suppliers to see purchase orders assigned to them using a web browser or mobile device. By accessing the portal, your suppliers can access a great range of inbound shipping functions like search purchase orders, enter freight information, generate shipment notifications, and create carrier shipments on purchaser's account.

By using this portal solution, companies can standardize a supplier communication process that improves the collaboration between trading partners, provides better visibility and helps control freight costs. SupplierPORTAL engages with SAP in real-time to update purchase orders with supplier information which streamlines the process flow and allows the organization to track all shipping events.

## Return on Investment

- Maximize efficiency with instant data retrieval
- Exert complete control over inventory carrying costs and inbound cost savings
- Gain greater supplier collaboration through mobile portal access
- Achieve real-time visibility into your entire shipping process
- Improve onboarding efficiency with easy-to-use HTML5 interface
